PROFILE SUMMARY:

Full Stack Developer skilled in PHP and MERN stack with experience in building secure, scalable web applications, REST APIs, and data-driven dashboards. Strong in backend logic, database design, and responsive UI development

TECHNICAL SKILLS:

- **Frontend:** HTML, CSS, JavaScript, Bootstrap, ReactJs, Codelgniter
- **Backend:** PHP, NodeJs, ExpressJs
- **Programming Languages:** Core Java
- **Database:** MongoDB, SQL

EXPERIENCE:

PHP Full Stack Developer – Softmate Systems LLP | Dec 2025 – Present

- Working on Government of Maharashtra web portals using PHP, Codelgniter, MySQL, HTML, CSS, JavaScript, and Bootstrap.
- Developing and maintaining dynamic forms, dashboards, and approval workflows for citizen and admin modules.
- Implementing server-side validations, file uploads, session handling, and fixing functional/UI bugs.
- Supporting database operations, pagination, routing, and performance improvements as per project requirements.

Full Stack Developer Intern – Cognifyz Technologies | Oct 2025 – Nov 2025

- Built a full-stack registration system using Node.js, Express.js and EJS with MVC architecture.
- Implemented secure client-side and server-side form validations.
- Developed REST APIs for user registration and user list management.
- Designed dynamic pages to display and manage user data efficiently.

PROJECTS:

Cyber Cafe Management System

Tech Stack: PHP, MySQL, HTML, CSS, JavaScript, Bootstrap, XAMPP

- Designed a web-based system to manage users, computers, and café operations.
- Implemented secure admin authentication with hashed passwords and PHP sessions.
- Structured MySQL database tables for user records, computer allocation, and session tracking.
- Added modules for user registration, computer assignment, fee calculation, and usage history.
- Integrated reporting features like between-dates summary, active users, and old/new user logs.

Airbnb Website Clone

Tech Stack: NodeJs, ExpressJs, MongoDB, EJS

- Developed a full-stack Airbnb clone with property listing, booking, and authentication features.
- Built complete CRUD functionality for property listings and booking management.
- Created RESTful APIs using Express.js and Mongoose for database operations.
- Integrated AI APIs for Article, Blog title, AI Image and Resume Reviewer generation features.

AI Code Reviewer

Tech Stack: MERN Stack, Google Gemini API

- Built an AI-powered code reviewer to analyze and improve user code quality.
- Integrated Google Gemini API for real-time code analysis and suggestions.
- Developed secure REST APIs using Node.js and Express.js.
- Designed responsive UI using React and deployed the project on Render.

Education:

- Mamasahab Mohal College Pune | B.Sc. (Computer Science) | CGPA: 7.47 | 2022-25
- Higher Secondary Education (HSC) | KBPV Sadashivnagar | 60.83% | 2022
- Secondary School Certification (SSC) | KBPV Sadashivnagar | 74.47% | 2020

CERTIFICATIONS:

- MERN stack and Core Java- Apna College
- TCS iON Career Edge – Young Professional (corporate etiquette, soft skills)
