PROFILE SUMMARY

PHP Full Stack Developer skilled in PHP, CodeIgniter, MySQL, JavaScript and REST API development. Strong foundation in MERN Stack with experience building secure, scalable and responsive web applications.

TECHNICAL SKILLS

Languages: PHP, JavaScript, SQL, Core Java

Technologies: PHP, CodeIgniter, Node.js, Express.js, React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, MySQL, MongoDB, Git, GitHub, Postman, REST APIs, Vercel, Render.

Areas of Interest: Backend Development, PHP Development, REST API Development, Web Development, Database Design, Problem Solving.

EXPERIENCE

PHP Full Stack Developer | Softmate Systems LLP

Dec 2025 – May 2026

- Developed and maintained **4 Government of Maharashtra portals** using PHP, CodeIgniter and MySQL, implementing **20+ CRUD modules**, approval workflows and citizen services.
- Built dynamic forms, dashboards, approval workflows and CRUD modules for citizen and administrative users.
- Implemented **server-side validation, session management, file upload functionality** and optimized database queries and reduced page response time by approximately **30%**.
- Collaborated with developers to resolve functional issues and deliver production-ready features.

Full Stack Developer Intern | Cognifyz Technologies

Oct 2025 – Nov 2025

- Developed a full-stack registration system using Node.js, Express.js, MongoDB and EJS following MVC architecture.
- Designed REST APIs for user registration, authentication and user management.
- Implemented secure client-side and server-side form validation.

PROJECTS

WonderLust – Airbnb Clone (Github Link: https://github.com/Rutuja-Sontakke/Airbnb_Website)

Tech Stack: Node.js | Express.js | MongoDB | Mongoose | EJS | Bootstrap | Express Session | MVC

- Developed a full-stack Airbnb-inspired villa booking platform using the **MERN backend stack (Node.js, Express.js, MongoDB)** with **MVC architecture**, implementing **20+ RESTful APIs** for authentication, listings, and host management.
- Built a secure **role-based authentication and authorization system** for **Hosts and Guests** using **Express Sessions, Cookies, and bcrypt password hashing**, ensuring protected routes and ownership-based access control.
- Designed a complete **Host Dashboard** with full **CRUD functionality**, allowing hosts to create, edit, update, delete, and manage their own property listings while preventing unauthorized modifications.
- Engineered a responsive and dynamic user interface using **EJS, Bootstrap, and server-side rendering**, featuring listing search, detailed property pages, **session-based navigation**, and **scalable database relationships** between Users and Listings.

ToolifyAI – AI SaaS Platform (Github Link: <https://github.com/Rutuja-Sontakke/ToolifyAi>)

Tech Stack: React.js | Tailwind CSS | JavaScript | React Router | Clerk Authentication | Vite

- Developed a responsive AI SaaS platform using **React.js** and **Vite**, featuring reusable component architecture, modern UI design, and optimized client-side routing for improved user experience.
- Built multiple AI-powered tools including **AI Article Writer, Blog Title Generator, AI Resume Reviewer, AI Image Generator, and Background Remover**, providing a unified interface for diverse AI services.
- Implemented **secure authentication and protected routes** using **Clerk**, enabling user registration, login, session management, and access control for authenticated users.
- Integrated external AI services with efficient API handling, loading states, error management, and responsive layouts to deliver a seamless cross-device experience.

EDUCATION

B.Sc. Computer Science

Mamasheeb Mohal College, Pune | CGPA: 7.47 | 2022–2025

CERTIFICATIONS

- MERN Stack & Core Java – Apna College
- TCS iON Career Edge – Young Professional
